How to create a new ORCID iD or to link the iD already acquired in IRIS

September 15, 2015

(edited by: Ufficio Anagrafe Ricerca, Archivi, Attività Editoriale; Divisione Supporto alla Ricerca Scientifica e al Trasferimento Tecnologico)
Why an ORCID iD? ORCID allows the author to:

1. get rid of errors due to namesakes, spelling mistakes, etc. connecting the author profile to a unique identifier;
2. automatically retrieves the main bibliographic data recorded in databases, catalogues, open access archives, social networks in which the author is registered and his/her works are indexed;
3. limit manual data entry;
4. avoid duplications.

Start the virtuous circle by entering the ORCID ID while submitting your work to your publisher!

For further information: FAQ ORCID
From September 15, 2015, when you open IRIS https://iris.unitn.it and login with UniTrento credentials, a pop-up will appear (NB! the login could be covered by the cookie info) informing on the need to create an ORCID ID or to link the one already acquired. After login in IRIS, click at the bottom of the the pop-up "iD Crea o associa il tuo ORCID ID " to continue.
Click “ID Crea un nuovo ORCID” if you don’t have an ORCID iD or “ID Associa il tuo ORCID” if you have already one.

Both by creating a new iD or by linking the one already acquired, you will be required to accept three permissions (here described) to configure ORCID iD for interoperability.
“ID Crea un nuovo ORCID” allows you to create for the first time an ORCID iD and to configure the iD for interoperability, through three authorizations, with the Italian National ORCID Hub (I.RI.DE project), IRIS UniTrento and loginMIUR Cineca.
“iD Associa il tuo ORCID” allows you to configure the ORCID iD already acquired for interoperability, through three authorizations, with the Italian National ORCID Hub (I.RI.DE project), IRIS UniTrento and loginMIUR Cineca.
At the end of the creation for a new ORCID iD or the linking for an iD already acquired, the IRIS profile is updated with the ORCID iD.
