**Art. 3 – THE DOCTORAL PROGRAMME**

1. The research topics of the Doctoral Course cover the fields of philosophy, history and cultural heritage under a European perspective which refers to Europe as a macro-regional context and a historic-cultural horizon. Teaching and research activities of the Course are focused on developing wide methodological and interdisciplinary skills. PhD students are expected to reach full reliability and autonomy in their research work, to acquire specialized skills and to add new inputs to the Department's lines of research.

2. **Specialized curricula**

   The variety of methodological approaches of the Course are represented by three specialized curricula, that will enable the PhD students to go deeper into specific research fields, in the frame of a single scientific community.

   - **Philosophy.** The object of analysis of this specialized curriculum concerns the origins – ancient, medieval and modern – of European philosophical thought, considered along a number of axes: logical-linguistic, ethical-practical-educational, epistemological and aesthetic. Focus will also be placed on the diverse religions of Europe as constitutive elements of the heritage common to the diverse range of European identities.

   - **History.** Central to the course will be the formation and development of European identities within a comparative perspective, from Greek and Roman civilization up to the present day. Particular attention will be devoted to the historical and historiographical relationship with the German-speaking world, to the building of traditions and of historical memory, and to the evolution of administrative, economic, military and governmental structures of European regions.

   - **Cultural Heritage.** The fields of research encompass the multi-faceted cultural heritage within European geographical and environmental space through the study of archaeological evidence, products of art and music, theatre history, documents and archives.

3. **Teaching Programme**

   The teaching plan includes educational and research activities for a total of 180 credits: 120 credits are assigned to research activities and 60 credits to educational activities. PhD students acquire the credits assigned to research activities by writing their doctoral theses (90 credits) and by taking part to scientific conferences and workshops (30 credits), while they acquire credits assigned to educational activities by attending seminars and lectures organized by the Course or by other scientific and educational institutions, and by attending conferences and workshops organized by the University of Trento or by other Universities. PhD students will carry out part of their studies at a foreign University or research institution on the basis of specific projects approved by the PhD Programme Committee and by the tutors.

   Each teaching activity will be endorsed according to the PhD student participation and to achievement of educational objectives. Educational activities will be certified and reported on the "student portfolio" by the PhD students and regularly verified by their tutors. The activities organized by other scientific and educational institutions must be approved beforehand by the Coordinator, if their duration is up to six months, or by the Doctoral Course Committee, if their duration is more than six months.

   Educational activities are organized as follows:

---

1 Opinion from the National University Council (CUN) of 20 March 2008; Note from the Ministry of Education University and Research (MIUR) of 14 September 2010 n. 1745; art.6 par.2 of Law n.398 of 1989 “Regulations about university scholarships”.

4. Admission to the following year

The training activities will be subject to periodic verification by the supervisors. Candidates who intend to compete also for one of the topic-specific grants, indicated in article n.1 of this call, must express their interest in the online application, in the section “Specialized curriculum and Research proposal”. Candidates who also compete for any topic-specific grant, added after the publication of this notice, must explicitly request it before the start of the evaluation of qualifications, in accordance to the terms set on the call webpage. These candidates will be evaluated on the knowledge of the specific subject matter(s) of that grant. The option for a topic-specific grant expressed by a candidate implies the preference of the candidate for the award of that specific scholarship with respect to all others.

5. The Admissions Committee has an overall score of 100 points available, partitioned in the following way:
   - 20 points for the assessment of curriculum vitae and qualifications;

3. The candidate who has been awarded a topic-specific grant, must accept it since the choice for a topic-specific grant he/she expressed, implies the candidate’s preference for the award of that specific scholarship with respect to the others. Renouncing the topic-specific grant implies the exclusion of the candidate from the right to enroll in the PhD Programme.

4. Unassigned topic-specific grants will result in the reduction of positions offered in the Call.
