## Art. 1 – SUBJECT OF THE CALL

The University of Trento opens the call for 1 position for the 36<sup>th</sup> Cycle (Academic Year 2020/2021) of the PhD Programme in Materials, Mechatronics and Systems Engineering, as regards the project **H2020-RUR-2020-2 - Research and Innovation Action “ONEforest”** (A Multi-Criteria Decision Support System For A Common Forest Management to Strengthen Forest Resilience, Harmonise Stakeholder Interests and Ensure Sustainable Wood Flows) as follows:

Positions: no. **1**  
Scholarships: no. **1**

The scholarship is funded by the University of Trento in the framework of the project H2020-RUR-2020-2 - Research and Innovation Action “ONEforest” about the following topic:

ONEforest supports the deployment of regional forest management concepts that strengthen forest resilience and sustainable wood supply leveraging wood-based products. Within this project, an innovative top soil coating (TSC), based on a bio-degradable bio-composite, with water regulating properties will be developed. This layer should control precipitation uptake and evaporation rate of the soil, to reduce erosion and nutrient leaching. This TSC will allow new seeding methods to expand forests. It will contribute to planting young trees on unfavourable sites (e.g. in arid regions). The objective of this PhD work is thus to engineer a suitable TSC and describe its physical, mechanical, chemical characteristics and its impact on forest soil microbial communities. An LCA study that takes the TSC into consideration will be performed to assess its environmental impact.

Candidates must carefully check the research topic and the required skills on the [selection webpage](#).
