

Rovereto Workshop on Concepts, Actions and Objects - Functional and neuronal perspectives - May 4 - 7, 2017

FRIDAY, 5 MAY 2017, POSTER SESSION A

NR	SURNAME	NAME	TITLE
1	AGLINSKAS	AIDAS	Network level taxonomy of the core/extended person perception system
2	AMALRIC	MARIE	Dissociation between language- and math-responsive networks in the brain
3	ARGIRIS	GEORGETTE	Modality-specific processing of natural and artificial entities: An EEG study
4	BACH	PATRIC	Attributing goals to others induces predictive biases in action observation: differential effects in autistic and typically developing individuals.
5	BANKSON	BRETT	Temporal dynamics of visual object processing and representational similarity
6	BARILARI	MARCO	The role of vision in the development of sound symbolism
7	BOLLINI	ALICE	Visual Processing in the blind hemifield of a hemianopic patient: Insights from ERPs.
8	BONN	CORY	Dot-size variance reduces biases in numerical discrimination and estimation tasks
9	BOUHALI	FLORENCE	Orthographic codes in the ventral visual system and the reading network revealed by complex grapheme manipulation
10	BRACCI	STEFANIA	View-invariant representation of communicative and action hand postures in human lateral occipitotemporal cortex
11	BRANDMAN	TALIA	What drives scene-selective representations in the brain?
12	BUCHMANN	ILKA	Anosognosia in Apraxia of Familiar Tool Use
13	CATTOIR	STEPHANIE	Is human middle temporal complex multimodal or supramodal?
14	COLTON	JAMES	Acting in spite of intention: action-effect anticipation is sufficient to induce non-willed motor responses
15	COUTANCHE	MARC	The interaction of conceptual dimensions for animate items in the human ventral stream
16	DECARLI	GISELLA	The inter-individual differences in number and face processing
17	DECROIX	JEREMY	Timing of gesture and outcome processing during action decoding
18	EL RASSI	ELIE	P1 and traveling alpha waves in the MEG
19	EL-SOURANI	NADIYA	I spy with my little eye: How contextual objects shape brain activity during action observation
20	ESPOSITO	GIANLUCA	Romantic attunement and its influence on brain response to emotional social stimuli
21	FALAGIARDA	FEDERICA	Face/voice integration of emotion expressions: a gating paradigm
22	FAROOQUI	AUSAF	Task Construals and Hierarchical Organization of Cognition
23	FINKEL	LISA	The role of frontal versus parietal contribution to impaired pantomime production after left hemisphere stroke
24	GAGGERO	GIULIA	Searching the subjective and objective sources of musical beauty
25	GIANNI	EUGENIA	The development of spatial representation and episodic memory
26	GILMORE	ADRIAN	Characterizing parietal memory network responses under incidental memory task conditions
27	MATTAPELLI	GIULIA	Object and action naming in patients with brain tumours: a VLSM study.
28	SPERANDIO	IRENE	Modulatory effects of conscious vision on pupillary light responses
29	TURELLA	LUCA	The role of the early visual cortex in action planning with and without visual information

Rovereto Workshop on Concepts, Actions and Objects - Functional and neuronal perspectives - May 4 - 7, 2017

SATURDAY, 6 MAY 2017, POSTER SESSION B

NR	SURNAME	NAME	TITLE
1	CESANA-ARLOTTI	NICOLO	Steps toward a pupillometry of the possible
2	ESPOSITO	ROMINA	Effects of cerebellar TBS on visuomotor adaptation: a multimodal approach
3	GORBUNOVA	ELENA	The role of object working memory in visual search for multiple targets
4	GOTTS	STEPHEN	Whole-brain disturbances of functional connectivity in apraxia relate to behavioral impairments in tool use and action selection
5	GREENE	MICHELLE	The Rapid Perception of Functional Scene Features
6	GROEN	IRIS	Convolutional neural networks best predict representational dissimilarity in scene-selective cortex, but not behavior
7	HAFRI	ALON	Neural representations of observed actions generalize across static and dynamic visual input
8	KABDEBON	CLAIRE	Labelling abstract representations in 5 month-old infants
9	KALIUKHOVICH	DZMITRY	Higher visual laterointermediate area in rats shows a greater degree of repetition suppression, position and clutter tolerance than primary visual cortex
10	LEONARDELLI	ELISA	Supramodal semantic representations – an MEG study
11	MAGNANI	FRANCESCA	Body Schema components in Parkinson Disease
12	MALFATTI	GIULIA	Modifications in action goal encoding during tool pantomimes reveal interactions between dorsal and ventral streams.
13	MARGONI	FRANCESCO	Do 21-month-olds distinguish between accepted authority and coercive dominance?
14	MCDONOUGH	KATRINA	Seeing is Believing? Prior knowledge of others' beliefs bias perception of their actions.
15	MONACO	SIMONA	Increased functional connectivity between the early visual cortex and sensory-motor areas when planning an action in the dark
16	PITCHER	DAVID	The superior temporal sulcus is causally connected to the amygdala: A combined TBS-fMRI study
17	RAGNI	FLAVIO	An eccentricity effect for different stimulus categories during visual imagery
18	READER	ARRAN	rTMS to left supramarginal area PF reduces digit velocity during imitation of finger gestures
19	ROSSIT	STEPHANIE	Cortical representations of tool-identity and tool-action properties during viewing and pantomiming
20	SCARPINA	FEDERICA	Tool-use effect on Body Schema in Parkinson's Disease.
21	SHARPS	HELEN	Children's goal-directed imitation and adult's automatic imitation have measurable continuity and may be reliant upon the same underlying mechanisms
22	SOLOMON	SARAH	Modeling individual concepts as graph theoretical networks
23	SURIAN	LUCA	Moral Judgment in Old Age: Evidence for an Intent-to-Outcome Shift
24	THORAT	SUSHRUT	Using convolutional neural networks to measure the contribution of visual features to the representation of object animacy in the brain
25	TONIN	DIANA	The effects of TMS over the lateral occipital (LO) and anterior intraparietal sulcus (aIPS) on real and pantomimed grasping
26	UBALDI	SILVIA	Temporal dynamics of the core and extended face perception system with fMRI
27	WANG	XIAOYING	Disentangling representations of object shape and manipulation in tool-related brain regions
28	WARD	EMILY	General transformations of object representations in human visual cortex
