

IEEE Second International Smart Cities Conference (ISC2 2016)

Improving the citizens quality of life
12-15 September 2016 | Trento - Italy

The IEEE International Smart Cities Conference (ISC2) is the flagship conference, sponsored by the IEEE Smart Cities Initiative

- to promote plenary discussions and collaborations between all entities and stakeholders involved in planning future urban scenarios
- to disseminate recent research advancements for successful smart cities implementation
- to increase citizens understanding and awareness of how their active participation is essential for smart city evolution

The theme of the 2016 edition of ISC2, hosted by the University of Trento, is ***Improving the citizens quality of life.***

The program of ISC2 2016 will consist of scientific sessions, tutorials, workshops and an exhibition. Also, ISC2 2016 will be enhanced by several other activities and initiatives within the **Trento Smart City Week (10-15 September 2016)**, such as:

- **panels** of discussion about topics of interest for smart cities, organized in cooperation with AssInge (Association of Italian Engineers Abroad), within the Workshop “Engineering trends and business opportunities for smart cities” (13-14 September 2016)
- **demos** showing the smart city vision of Trento, and presentations by the Working Groups of the IEEE Smart Cities Initiative on the following topics: Big Data and Open Data, Smart Government, Health and Well-being, Smart Energy, Integrated Tourism, Smart Mobility
- **industrial exhibitions** on technical solutions for smart and sustainable cities
- a **hackathon**
